SUMMARY

Full-stack developer experienced in building scalable web apps using JavaScript, React, Node.js, Python (Flask), and MongoDB. Solid understanding of data structures, algorithms, OS, and OOP. Skilled at debugging, performance optimization, and full-stack deployments.

TECHNICAL SKILLS

• **Languages**: JavaScript

• **Frameworks/Tools/ Web technologies**: HTML5, CSS3, Bootstrap, React, Node.js, Express, Git, GitHub, VS Code

• **Databases**: MongoDB, MYSQL

• **Core CS**: Data Structures & Algorithms, Operating Systems, OOP, DBMS

• **Other**: REST APIs, Code Debugging

EDUCATION

- **B.Tech – Computer Science Engineering**, Aurora's Scientific & Technological Institute (2023–2026)
- **Diploma – Electrical & Electronics Engineering**, SVS Group of Institutions (2020–2023)

PROJECTS

YouTube Video Downloader (Flask + Python)

• Built a video downloading web app using Flask + pytube.

• Implemented backend video extraction, error handling, and file processing.

• Designed responsive UI and optimized request performance.

Job Compass – Full-Stack Career Platform (React, TypeScript, Node.js, MongoDB)

• Developed job search, resume builder, and interview prep modules.

• Created secure authentication and REST APIs using Node.js.

• Built responsive UI components and deployed on Vercel.

Expense Tracker (Web App)

• Built daily expense tracking system with CRUD operations.

• Improved UI responsiveness and implemented local persistence.

CERTIFICATIONS

• Full Stack Web Development – Pantech.ai
